

Climate Action for Business

This Climate Action webinar series provides businesses with a comprehensive understanding of both their impacts on climate change and climate change's impact on their businesses. In order to achieve this several relevant subject matters, such as climate impact risk assessments, alignment of businesses to climate change, climate change mitigation and climate reporting, are discussed.

Understanding Climate Risk Assessment and Adaptation

This first webinar equips businesses with an understanding of the risks climate change poses to businesses.

The following topics are covered:

- Introduction to climate risks
- Types of risk and determinants of risk
- Risk screening tools (freely available)
- Showcase of a fee-based solution
- Insights on climate adaptation

Driving Climate Change Mitigation

The aim of the second session is to give businesses an understanding of their impacts on climate.

The following topics are covered:

- Climate Roadmap as a lever to mitigate climate change
- Tangible steps to activate decarbonization in your business
- Business example on reduction interventions

Essentials of Climate Reporting

The third webinar focuses on climate reporting essentials.

The following topics are covered:

- An overview of key frameworks and regulations, both voluntary and mandatory
- An in-depth overview of regulations relevant to Swiss companies, helping businesses align with the latest standards and requirements
